

Kollector is an online application telling in **REAL TIME** when (date and hour) and where (country, radio station's name) a specific song is played on radio. The end result is then displayed and detailed with several lists, diagrams and graphics, allowing for important groundbreaking possibilities in the management of musical repertoires.

Kollector can be of multiple uses to all in the music industry:

AUDIO WORKS MANAGEMENT TOOL

- Tracking of albums/single airplays and discover trends before it's gone public.
- Follow-up of promotions.
- Planning of tours and evaluate the potential of regional markets.
- Immediate feedback on efficiency of singles.
- Comparative watch.
- Realtime vital and worldwide datas that can be shared with partners.

ROYALTIES MANAGEMENT HELPING TOOL

- Help forecast airplay royalties for publishers and collecting societies.

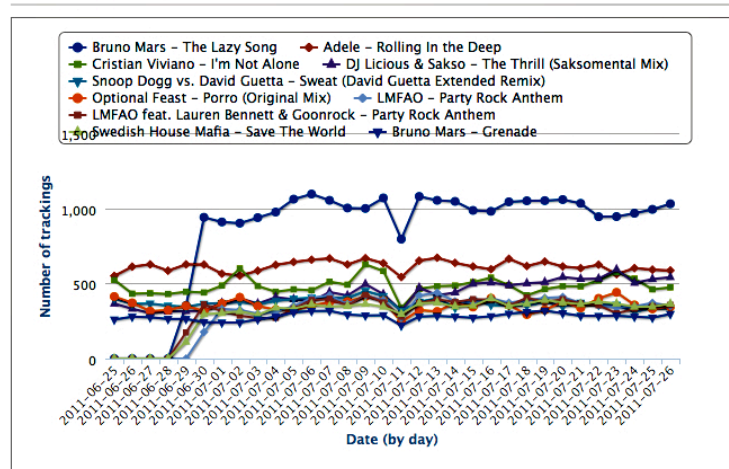

Discover the new opportunities of realtime airplay tracking and **try the free Beta version on www.Kollector.com**
